Project Name	Flood Risk Prediction Using Machine Learning
Maximum Marks	2 Marks

Customer Journey Map

Map out the disaster management officer's journey in using a flood prediction system.

Phase of Journey	Stage 1 Data Monitoring	Stage 2 Prediction & Decision	Stage 3 Response & Action
Actions	Collect rainfall/weather data	Review flood risk prediction	Issue alerts and coordinate evacuation
Touchpoint	Weather dashboard, sensors	ML prediction dashboard	Emergency response system
Customer Thought	Is the incoming data reliable?	Can I trust this prediction?	Will people receive the warning in time?
Customer Feeling	Curious but cautious	Concerned yet confident	Responsible and relieved
